

**BIME 590**  
**Biomedical and Health Informatics Lecture Series**  
**Thursdays, 4:00-5:00pm, UW Medicine, South Lake Union**

**Course Facilitator:** Adam Wilcox, PhD  
Professor and Chief Analytics Officer  
Department of Biomedical Informatics and Medical Education

Welcome to BIME 590: Biomedical and Health Informatics Lecture Series.

### **Overview**

This course is the primary seminar course for the Biomedical and Health Informatics Division within the Biomedical Informatics and Medical Education department. While it is a required course for students in the division, it also serves as a vehicle for advancing the research knowledge of the full department, and all are encouraged or required to attend.

The format of the seminar course is a weekly seminar either from a faculty member in the department, a senior student or fellow nominated by a faculty member, or a research professional external to the department. Speakers will present their research and related information, and then the audience will have opportunities to ask questions.

### **Time and Location**

For Spring 2017, seminars are Thursdays, 4:00-5PM at the South Lake Union building. Most seminars are in the C123AB Conference Room (Building C, 850 Republican St, Seattle, WA 98109). Most seminar presentations will be available through livestream and archived video at [tcs.slu.washington.edu](http://tcs.slu.washington.edu), though registered students are required to attend in person.

The first seminar is March 30, and the last seminar is June 1.

### **Grading**

This is a Credit/No Credit course. For credit, students are assessed on attendance and allowed only one unexcused absence per quarter. Excused absences must be arranged with the instructor.

Students are expected to be engaged audience members by listening attentively and asking questions. A final report will not be required in the Spring quarter.

### **Schedule**

March 30: **NO CLASS**

April 6: Peter Myler, PhD

April 13: Cris Ewell, PhD

April 20: George Demiris, PhD

April 27: Anne Turner, MD

May 4: Xinran Liu, MD

May 11: Gang Luo, PhD

May 18: Pat Areán, PhD

May 15: TBD

June 1: Katie O'Leary, Information Science PhD Student
